

## SEMICON Europa 2022 to Highlight Smart Mobility, Smart MedTech, Advanced Packaging, Fab Management, Materials, Sustainability and Talent – September 28, 2022

**SEMICON<sup>®</sup>**  
**EUROPA**

**MUNICH, Germany – September 27, 2022** – Innovations in advanced technologies such as Smart Mobility, Smart MedTech, advanced packaging, fab management, materials, and other semiconductor industry growth drivers will come into sharp focus as visionaries and experts gather at Messe München in Munich, Germany 15-18 November for [SEMICON Europa 2022. Registration is open.](#) Themed *Chips Powering The Data Age*, and co-located with electronica, SEMICON Europa 2022 will also highlight challenges and opportunities in sustainability, workforce development and across the supply chain as the semiconductor industry unites to address these critical issues. Europe's largest microelectronics event, SEMICON Europa 2022 will feature an exhibition, conferences, forums and panel discussions.

"We are delighted to welcome key semiconductor industry leaders from across the value chain back to Munich to collaborate and discuss innovations vital to semiconductor industry growth in Europe and around the world," said Laith Altimime, president of SEMI Europe.

### SEMICON Europa Highlights

- **Opening Ceremony:** Executives from **Airbus, Athina, Edwards Vacuum, imec, Porsche** and **Samsung** will share their perspectives on key topics such as accelerating innovation, a sustainable and connected future, and European manufacturing excellence.
- **Advanced Packaging Conference:** Thought leaders will highlight advanced solutions for electronics packaging and test, manufacturing equipment and materials, design for reliability and test, and Heterogeneous Integration (HI).
- **Fab Management Forum:** Experts will discuss topics such as chip manufacturing, datafication of fabs, and AI in microelectronics manufacturing as the industry intensifies its focus on long-term resilience strategies in light of COVID-19 and recent supply chain disruptions.
- **ITF Beyond 5G – Powered by imec:** Experts will discuss Radio Frequency (RF) technology challenges and opportunities ranging from materials and devices to integrated circuits (ICs) and modules as advanced chips and compound semiconductors pave the way to next-generation mobile connectivity.
- **SEMI Networking Night:** This event will gather stakeholders from across the electronics industry to connect with peers and explore new business partnerships.

### Executive Forum Program

- **The Future of Work:** Experts will discuss the importance of inclusive leadership in building a sustainable workforce and overcoming critical industry challenges such as the global talent shortage and increasing workplace diversity.

- **Materials Innovation:** This session will explore materials innovation developments and challenges related to atomic-scale processing and control of interfaces, morphology, composition, and 3D conformality.
- **Smart Mobility Forum:** Led by SEMI Europe's Global Automotive Advisory Council (GAAC), this forum will provide an overview of industry stakeholders across the automotive and electronics value chains and discuss opportunities for overcoming current challenges faced by the automotive semiconductor industry.
- **Electrification and Power Semiconductors:** With semiconductor innovation enabling the electrification of a wide variety of industries, this session will highlight key trends in the field of power semiconductors such as improving semiconductor manufacturing efficiencies and technologies.
- **Smart and Green Manufacturing Summit:** Fab investments worldwide continue to grow to meet the demands of digital transformation as the semiconductor industry works to reduce its carbon footprint. This summit will explore how greater automation, data analytics, and resource-saving technologies will help the semiconductor industry achieve its sustainability goals.

### TechARENA Program

- **Integrated Photonics:** Photonic Integrated Circuits (PICs) will play a key role in future infrastructure for communication, biosensing, and mobility. This session will showcase the latest PIC technologies and applications and provide insights into current scientific and industrial advancements.
- **Smart MedTech Forum:** The global pandemic has proven that a collaborative ecosystem can accelerate the introduction of healthcare solutions. This forum will examine how the medical industry will evolve to develop future therapies.
- **Future of Computing:** Experts will showcase innovative computing solutions for edge devices and lower power consumption, as well as new paradigms for more efficient computing solutions.
- **From Edge to Cloud – Leveraging AI-driven Mechatronics for Resilient Manufacturing:** Powerful intelligent mechatronic systems are helping manufacturers across industries achieve greater levels of productivity. Industry experts will discuss how Intelligent Motion Control under [Industry4.E](#) (IMOCO4.E) can help businesses meet the challenges of digital transformation.
- **Innovation Showcase:** SEMI will highlight microelectronics and semiconductor innovations in pre-recorded messages and product announcements.

Press and media partners can register for free by contacting Serena Brischetto at [sbrischetto@semi.org](mailto:sbrischetto@semi.org).

### SEMICON Europa Sponsors

- **Platinum:** [Samsung](#) and [Tokyo Electron \(TEL\)](#)
- **Gold:** [Edwards Vacuum](#) and [JCET Group](#)
- **Silver:** [Agilent](#), [centrotherm clean solutions](#), [Ecatec](#), [Exyte](#), [Flexciton](#), [KLA](#), and [SÜSS MicroTec](#)
- **Event sponsors:** [ASE Global](#); [Atotech](#), an MKS Brand; [EBARA](#), [EV Group \(EVG\)](#); [INFICON](#); [Koh Young Europe](#); [Lab14](#); [Lam Research](#); [SCREEN](#); [time:matters](#); and [ZEISS](#)

### About SEMI

SEMI® connects more than 2,500 member companies and 1.3 million professionals worldwide to advance the technology and business of electronics design and manufacturing. SEMI members are responsible for the innovations in materials, design, equipment, software, devices, and services that enable smarter, faster, more powerful, and more affordable electronic products. Electronic System Design Alliance (ESD Alliance), FlexTech, the Fab Owners Alliance (FOA), the MEMS & Sensors Industry Group (MSIG) and SOI Consortium are SEMI Strategic Technology Communities. Visit [www.semi.org](http://www.semi.org), contact one of our worldwide offices, and connect with SEMI on [LinkedIn](#) and [Twitter](#) to learn more.
